SCHOOL™

RR SCHOOL™

Let's discover who we are and what's our mission

**The Remote School is an online school
proposing remote trainings in the digital area.**

Our mission : create an attractive website for the Remote School.
Our deadline : June the 6th.
Our team : Anne, Diana & Leonore.

What has been accomplished so far !

1. Website users stories & backlog tasks list
2. Website Wireframe
3. Just started to built the landing page !

RR SCHOOL™

1. USERS STORIES & BACKLOG

— USERS STORIES

As a user, future student, I want to :

- navigate between between pages

- be able to find any content easily on the website

- discover the courses proposed by the remote school,

- be able to contact easily the remote school

- learn more about the school (thanks to former students testimonials)

=> all this in having a pleasant experience when I visit the website.

— USERS STORIES

As a future student, I want to understand how it works to learn remotely & to have the possibility to apply.
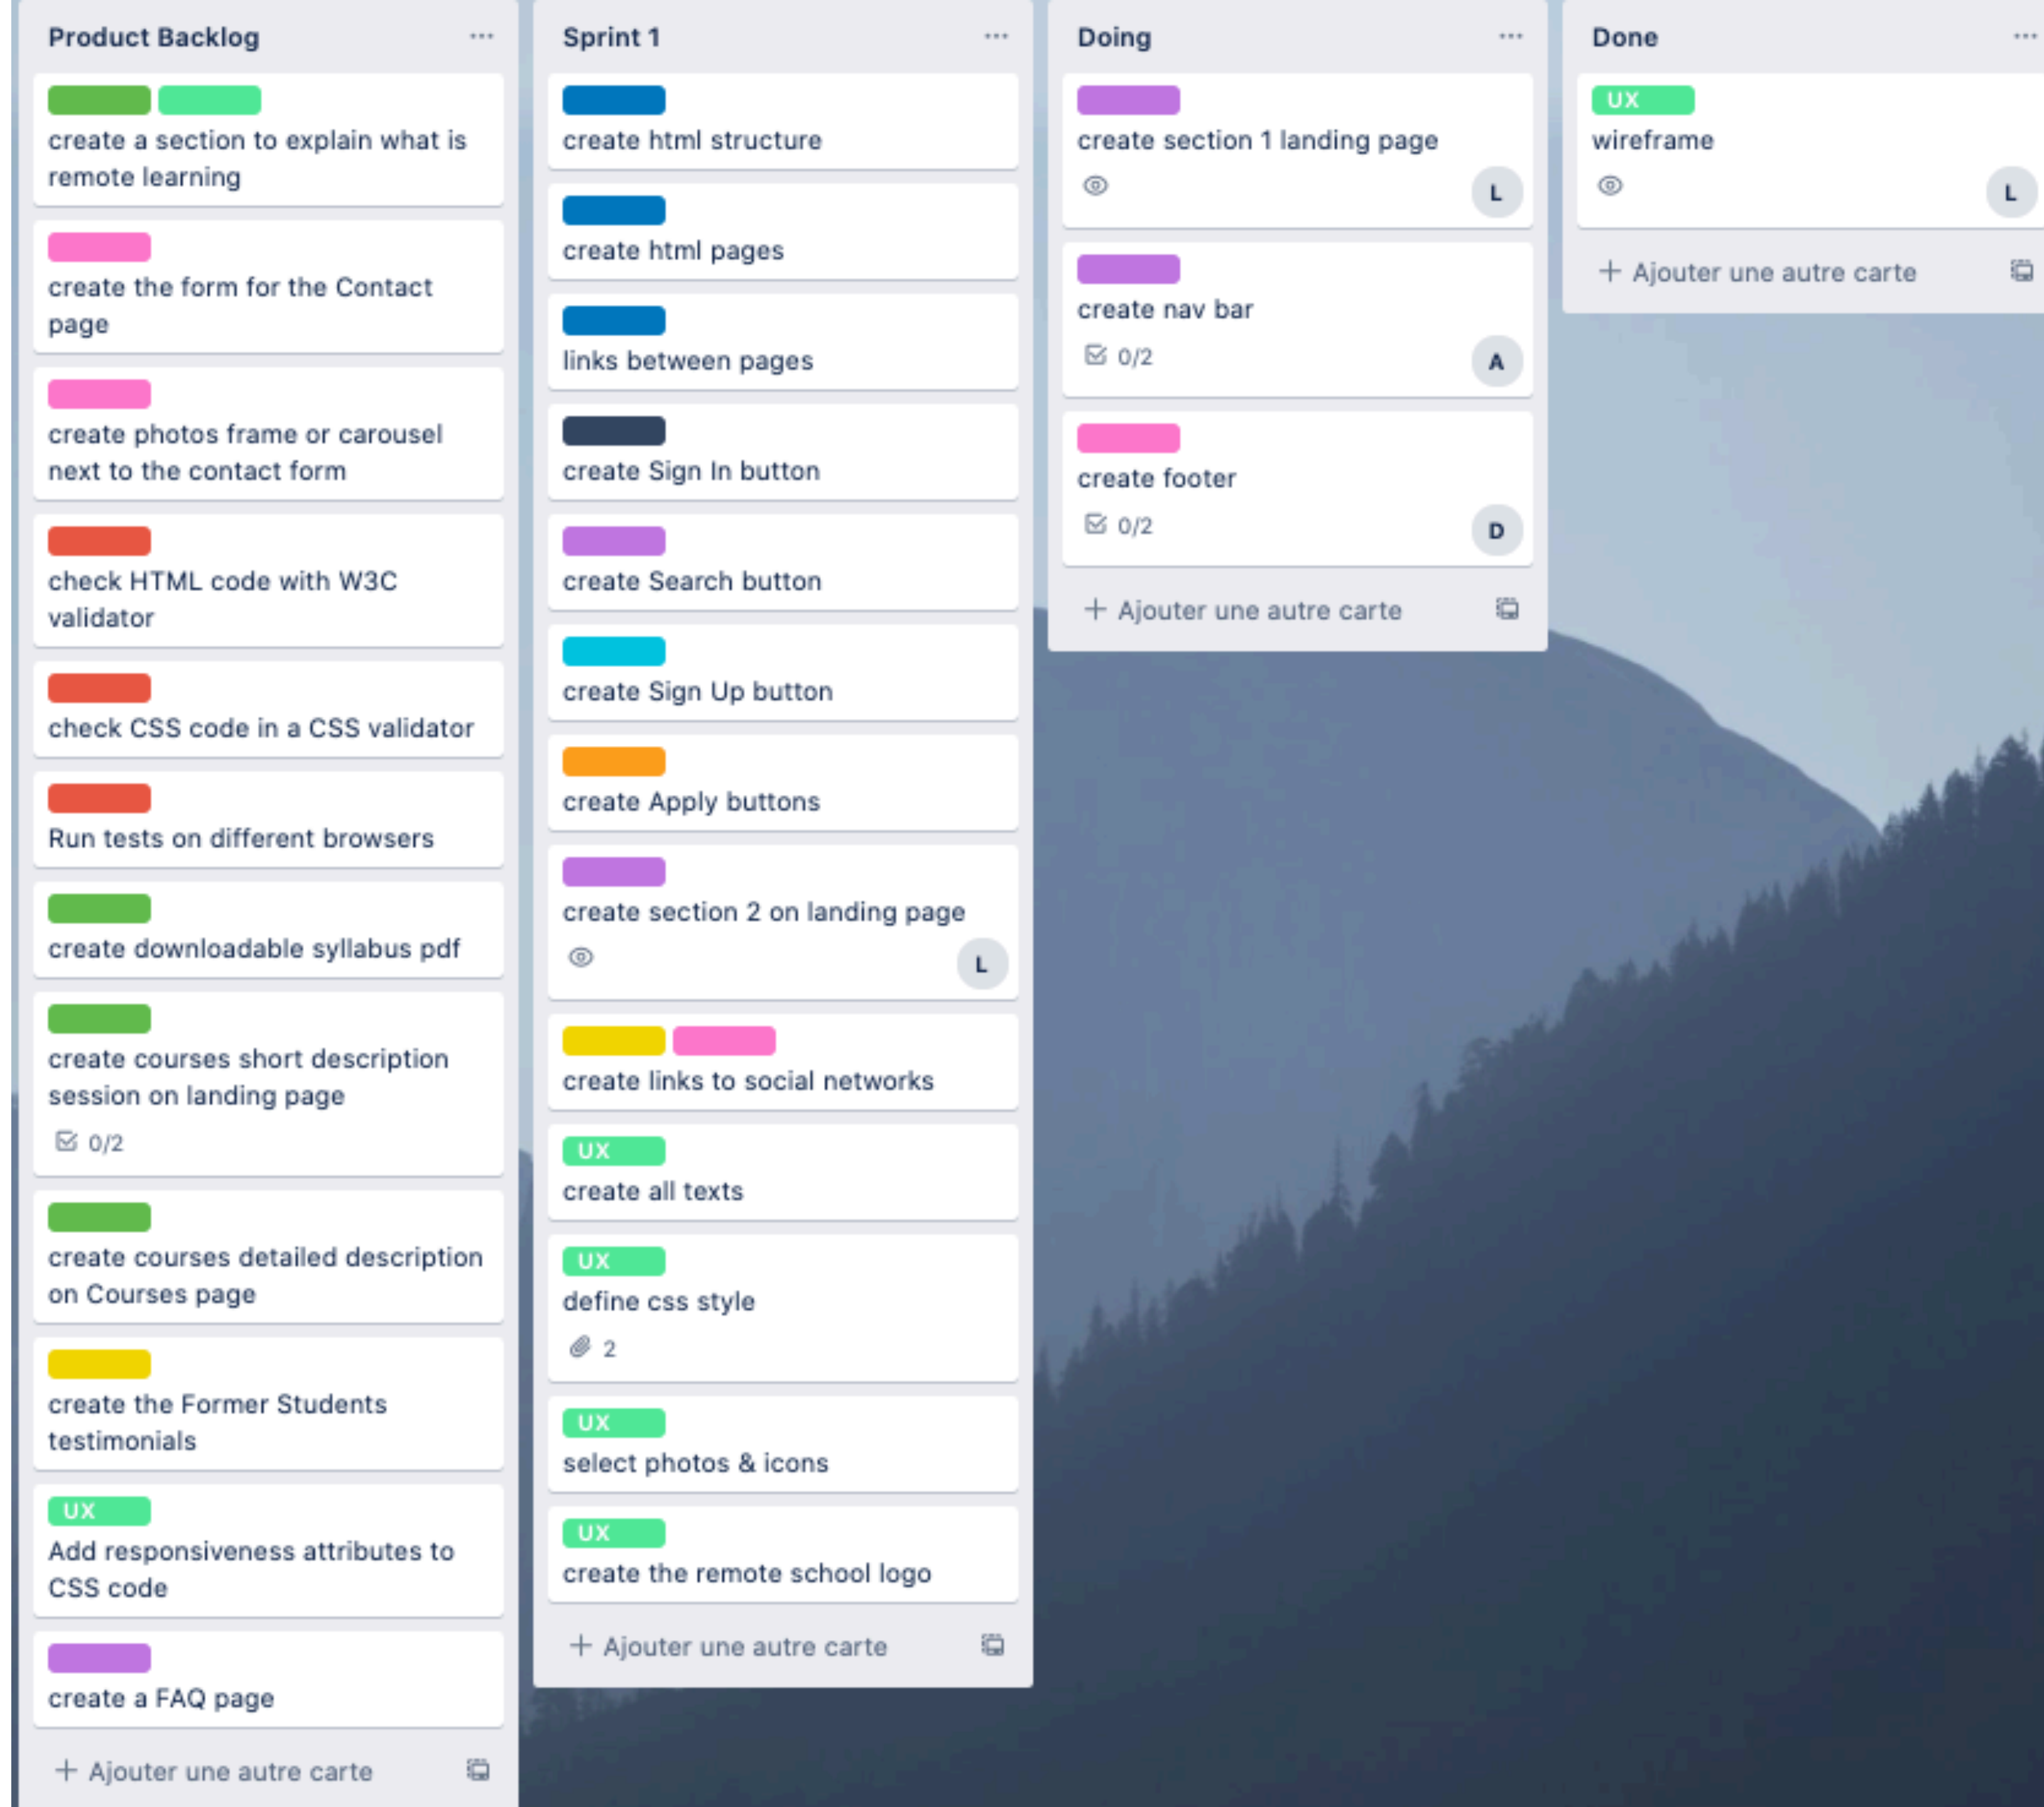

As a future member, I want to be able to sign up & to sign in when member.

As an admin, I want to check that the website runs smoothly.

ЯR SCHOOL™

— BACKLOG

Here is a quick view at the different tasks we will have to accomplish in the coming weeks.

Product Backlog · · ·

create a section to explain what is remote learning

create the form for the Contact page

create photos frame or carousel next to the contact form

check HTML code with W3C validator

check CSS code in a CSS validator

Run tests on different browsers

create downloadable syllabus pdf

create courses short description session on landing page
☑ 0/2

create courses detailed description on Courses page

create the Former Students testimonials

UX
Add responsiveness attributes to CSS code

create a FAQ page

+ Ajouter une autre carte

Sprint 1 · · ·

create html structure

create html pages

links between pages

create Sign In button

create Search button

create Sign Up button

create Apply buttons

create section 2 on landing page
👁   L

create links to social networks

UX
create all texts

UX
define css style
📎 2

UX
select photos & icons

UX
create the remote school logo

+ Ajouter une autre carte

Doing · · ·

create section 1 landing page
👁   L

create nav bar
☑ 0/2   A

create footer
☑ 0/2   D

+ Ajouter une autre carte

Done · · ·

UX
wireframe
👁   L

+ Ajouter une autre carte

2. WIREFRAME

We started building a wireframe to understand easily
the main structure of the Remote School website :
- one landing page including a nav bar, some buttons, a first glance at
the main courses, a footer with contact elements.
- three pages : Courses, Students, Contact.

REMOTE SCHOOL

Makes you feel at home - cause you actually are at home

3. CODING !

Let's have a first glance at the Remote School future's website ;-)

even if it's not so much ...!

Thank you !
